

# S-CON COMPACT

**S-CON Compact 250** with two cutting units, grid rewriter and sheet delivery for the production of self-adhesive labels from roll to sheet.

## S-CON Compact

For challenging jobs in a compact design

# S-CON Compact

## For challenging jobs in a compact design

The S-CON Compact machine series convinces with a surprisingly big processing flexibility and at the same time requires only very little space.

### Examples for products and applications

- Blank labels
- Technical labels
- Special stamped parts (for example non-wovens, foam, filters, adhesive parts)
- Embossing Applications

### Optional extensions

- Decurling unit
- Antistatic equipment
- Stacking units
- Friction shafts
- Interchangeable expansion shafts
- Modifications and extensions for individual requirements possible

**S-CON Compact 550** with one cutting unit and aspiration for the punch waste for the production from roll to roll.

### Your advantages

- Variable assembly of diverse cutting and embossing processes
- Optimum web guide by electronically regulated edge guide control
- Longitudinal cutting unit with digital position display for an exact cross adjustment of the knives
- Very simple handling via an ergonomically arranged control panel
- Very short set-up times and low material consumption during set-up thanks to progressive solutions (for example pneumatically adjustable spindle bridge)
- Subsequent treatment from roll-to-roll or roll-to-sheet

### Technical data

Web width	250 - 550 mm
Speed mechanically max.	160 m/min
Roll diameter standard optionally up to	600 mm 1200 mm
Power supply	400 V 50/60 Hz /N/PE
Pneumatic supply	6 - 8 bar oil-free

\* Larger web widths on request
