cutting unit with PowerCheck, PowerBridge and
Variabase, LabelShifter and longitudinal cutter.
Inspect, cut, strip and convert labels from roll to roll.

S-CON Vert

Winding, inspecting and converting on the highest level

Winding, inspecting and converting on the highest level

The new S-CON VERT combines ample application variability for challenging jobs with a very simple handling and a perfect final inspection.

The robust design together with state-of-the-art automation technology and the latest inspection hardware renders the S-CON VERT an ideal allrounder for all jobs in the narrow web segment as well as in quality- and security-sensitive sectors.

Examples for products and applications

- Self-adhesive labels
- Pharmaceutical and high security products, value printing
- Food and cosmetics industry

Optional extensions

- 100% inspection system with automatic braking and positioning of the bad spot on the inspection table
- Cutting unit with grid rewriter
- Waste rewriter with further cutting table
- Antistatic equipment

- Integrated roll handling for ergonomic roll change
- Aspiration systems for punched waste
- Interchangeable expansion shafts
- Modifications and extensions for individual requirements possible

Your advantages

- Onesided bearing with comfortable web guide
- Advanced machine control with modern drive technology on the basis of international machine standards
- Optimum web guide by electronic side edge control
- Integrated counter (labels / meter, six digits)
- Easy handling by HMI with LCD touch screen (multilingual)
- Robust machine construction provides for longevity and low maintenance

Technical data

Web width	250 - 550 mm
Speed mechanically max.	250 m/min
Roll diameter up to	1200 mm
Power supply	400 V 50/60 Hz /N/PE
Pneumatic supply	6 - 8 oil-free
